

THE
American Astronomical Society

hereby awards the

2023 Lancelot M. Berkeley

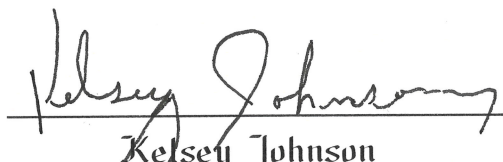

New York Community Trust Prize
for Meritorious Work in Astronomy

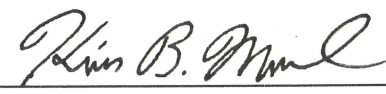

to

The Gaia Collaboration

For enabling a transformative multidimensional map of the Milky Way. Since its launch in 2013, the European Space Agency's Gaia Observatory has recorded stellar positions, distances, colors, and proper motions for nearly two billion stars. Its three data releases will long be regarded as major events in the history of astronomy, triggering a global partnership to better understand the origin, structure, and destiny of our home galaxy.

Presented 12 January 2023

Kelsey Johnson
President

Kevin B. Marvel
